ABOUT US

TaiStat Firm is a Nairobi-based tech company delivering smart, scalable solutions in AI, data analytics, machine learning, automation, surveys, user research, and digital development.

Our expert team has hands-on experience in AI, data science, and digital transformation, from building chatbots and running large-scale surveys to creating responsive websites and annotating datasets.

We support industries including Education, Research, AI, E-commerce, Agriculture, Hospitality, and Technology, helping clients scale projects, automate operations, and unlock insights in emerging markets.

Choosing TaiStat as your partner means more than outsourcing a task—you gain a committed team that collaborates with you every step of the way. We tailor our approach to your objectives to ensure your goals are met with excellence.

Smart solutions. Real impact. TaiStat delivers.

WHY CHOOSE US

01 **Client-Centered Approach**
We listen, collaborate, and design solutions that fit your specific goals.

02 **Proven Expertise**
Our team combines technical mastery with hands-on experience across industries.

03 **Scalable Solutions**
From startups to enterprises, our systems grow with your needs.

04 **Innovation at the Core**
We harness AI, data, and automation to keep you ahead of the curve.

05 **Trusted Delivery**
Precision, timeliness, and quality define every project we handle.

WHY WE ARE THE BEST

We don't just deliver tech—we create smart, scalable solutions that make your business faster, smarter, and future-ready. With TaiStat, you get innovation that works, a team that cares, and results that set you apart.

OUR SERVICES:

➡ **Digital Presence & Marketing**
Boost visibility with ad campaigns, website design, social media management, and creative brochures.

➡ **Point-of-Sale (POS) Solutions**
Custom POS systems for restaurants, retail shops, hotels, and more—streamlining sales, billing, and guest services.

➡ **AI & Intelligent Systems**
From chatbots to predictive analytics, ML, and NLP, we deliver smart solutions that optimize decisions and drive growth.

➡ **Research & Analytics**
Transform data into insights with expert consultancy, analytics, and human-in-the-loop research services.

➡ **Smart Agriculture & Climate Solutions**
AI-powered farming tools, crop disease detection, seasonal planning, and sustainability strategies.
